

Rugged, Airtight, and Waterproof Armor Case™

Ultimate Data Protection Solutions

The Challenge

Businesses are constantly challenged by a growing list of threats to their computer systems and data integrity. Without proper planning and preparation, businesses can easily fall victim to one of these threats, often with devastating consequences. According to Gartner, Inc., a technology research firm, 40% of businesses that suffer severe data loss fail within five years. In addition to utilizing technology solutions to protect data, it is also essential to integrate a physical data protection solution when transporting or using computer equipment in the field.

A data loss or computer system catastrophe can strike at any time. You need to protect your laptop, PDA, accessories, and other computer systems with a rugged case that provides physical protection from exposure to the elements, such as sand, dust, and water, as well as data loss due to impacts like accidental drops.

The failure to effectively protect information and computer systems can result in the interruption of normal business activities. Recovery often involves not only extra IT costs, but also lost sales, reduced employee productivity, and an adverse effect on business reputation.

The potential cost of recovery can soar well beyond what may be expected. Disaster recovery planning is paramount to ensuring that computer equipment is protected at all times. Businesses need a solution to avoid the consequences of data loss due to harsh environments that pose a significant threat to computer equipment, devices, and accessories.

The Solution

Used with ArmorCore® Technologies' suite of software and hardware data protection and security tools, Armor Case™ provides a rugged and reliable physical data and computer protection solution to insulate products from water, sand, dust, and impacts that can result in the loss of critical data. Armor Case delivers the strongest and most versatile physical protection for laptops, PDAs, Armor FaStor™, Armor RAID™, and other computer devices.

In addition to its rugged design, Armor Case allows you to plug in laptops and PDAs without taking them out of their cases, making them easy-to-use in any situation and resilient to any adverse environmental conditions. The Armor Case also provides constant protection from the elements when transporting Armor FaStor cartridges offsite for storage or Armor RAID drives for repair. Since Armor Case is available in a variety of shapes and sizes, it is compatible with any computer equipment to enable total data protection.

In today's competitive business environment, companies simply can't afford the time and costs associated with data loss or computer downtime. Armor Case combines ruggedness, reliability, ease-of-use, and affordability to reduce risks, system downtime, and IT management costs. The Armor Case solution provides constant access to critical data for continuity in day-to-day business operations, ensuring data protection 24 hours a day, 7 days a week, 365 days a year.

No other case provides this kind of protection. Armor Case features::

- Ultimate physical protection—impact resistant cases protect computer equipment during transport
- A waterproof design—systems are completely protected even if the case is exposed to water
- Ability to affordably transform your regular laptop and PDA into a rugged laptop and PDA
- Incredible drop protection—even if an Armor Case is dropped, the system is still protected from the impact
- Access to all ports through the case without having to open the case and expose the equipment to a potentially adverse environment
- An airtight design—even dust particles are prevented from entering the case
- Ability to easily transport Armor FaStor and Armor RAID without the fear of damage or data loss
- Versatility—use laptops and PDAs while in their cases for constant rugged protection, or remove them from their cases for normal environmental operation

Armor Case Product Overview

Armor Case is a vital physical data protection solution that guards laptops, PDAs, Armor FaStor, and Armor RAID from data loss due to impacts and environmental conditions.

Description	Armor Case for Laptops	Armor Case for PDAs	Armor Case for Armor FaStor	Armor Case for Armor RAID
External Dimensions	16.375" x 14.5" x 3.375"	6.50" x 4.50" x 2.20"	8.813" x 5.175" x 2.080"	8.813" x 5.175" x 2.080"
Internal Dimensions	14.2 wide x 11.2" deep x 1.9" thick	5.56" wide x 3.50" deep x x 0.93" thick	7.884" wide x 3.973" deep x 1.547" thick	7.884" wide x 3.973" deep x 1.547" thick
Weight	6.5 pounds	0.75 pounds	0.86 pounds	0.86 pounds
Outside Material	ABS plastic reinforced with fiberglass	ABS plastic reinforced with fiberglass	ABS plastic reinforced with fiberglass	ABS plastic reinforced with fiberglass
Inside Material	Foam lining is composed of open cell polypropylene foam	Foam lining is composed of open cell polypropylene foam	Foam lining is composed of open cell polypropylene foam	Foam lining is composed of open cell polypropylene foam
Color Options	Black	Black, Yellow	Black, Yellow, Blue, Clear, Black/Clear, Yellow/Clear, Blue/Clear	Black, Yellow, Blue, Clear, Black/Clear, Yellow/Clear, Blue/Clear
MIL SPEC Standard	MIL SPEC 810F	MIL SPEC 810F	MIL SPEC 810F	MIL SPEC 810F
Ingress Protection Standard	IP67	IP67	IP67	IP67

The Company

ArmorCore provides comprehensive disaster recovery solutions for individuals, small- and medium-sized businesses, and IT departments. Our backup and recovery products feature state-of-the-art technology that protects the integrity of critical data, minimizes downtime, and ensures continuity of operations. We recognize the vital nature of your data assets. We are, therefore, committed to developing robust, transparent, and easy-to-use solutions that eliminate the possibility of catastrophic information loss.
